

LINACRE COLLEGE

Policy and Guidance on the Possession, Supply, and Production of Drugs and Psychoactive Substances

Linacre College operates a zero-tolerance policy on the illegal use of drugs and psychoactive substances. The College will co-operate fully with the Police in any investigation involving their unauthorised possession, use and supply, and follow the procedures set out in College By-Law 7 on Discipline, Ill-Health and Student Members. If the College was knowingly to permit such offences to take place on its premises, it would itself be liable for prosecution.

At the same time, the College wishes to offer all possible support to students seeking medical and/or counselling help regarding drugs and substance abuse. The guidance contained in this policy sets out both the key legislation governing drugs and substance offences, and the main sources of support available for further advice and guidance.

College members might not be familiar with the UK drugs and psychoactive substance legislation and penalties. The UK [Misuse of Drugs Act 1971 \(MDA\)](#) divides drugs into three classes – A, B and C – and all classes can carry custodial sentences. The maximum penalties for drug possession, supply, and production depend on what type or ‘class’ the drug is. These are set out in the table below:

Class	Drug	Possession	Supply and production
A	Crack cocaine, cocaine, ecstasy (MDMA), heroin, LSD, magic mushrooms, methadone, methamphetamine (crystal meth)	Up to 7 years in prison, an unlimited fine or both	Up to life in prison, an unlimited fine or both
B	Amphetamines, barbiturates, cannabis, codeine, ketamine, methylphenidate (Ritalin), synthetic cannabinoids, synthetic cathinones (e.g. mephedrone, methoxetamine)	Up to 5 years in prison, an unlimited fine or both	Up to 14 years in prison, an unlimited fine or both
C	Anabolic steroids, benzodiazepines (diazepam), gamma hydroxybutyrate (GHB), gamma-butyrolactone (GBL), piperazines (BZP), khat	Up to 2 years in prison, an unlimited fine or both (except anabolic steroids - it's not an offence to possess them for personal use)	Up to 14 years in prison, an unlimited fine or both
Temporary class drugs*	Some methylphenidate substances (ethylphenidate, 3,4-dichloromethylphenidate (3,4-DCMP), methylnaphthidate (HDMP-28), isopropylphenidate (IPP or IPPD), 4-methylmethylphenidate, ethylnaphthidate, propylphenidate) and their simple derivatives	None, but police can take away a suspected temporary class drug	Up to 14 years in prison, an unlimited fine or both

*The government can ban new drugs for 1 year under a ‘temporary banning order’ while they decide how the drugs should be classified.

This is the list as of October 2017 (<https://www.gov.uk/penalties-drug-possession-dealing>).

In addition, the UK [Psychoactive Substances Act 2016](#) covers all drugs previously referred to as “legal highs”, which are not Class A, B or C drugs under the Misuse of Drugs Act 1971, but that are also now illegal.

“The Act makes it an offence to produce, supply, offer to supply, possess with intent to supply, import or export psychoactive substances; that is, any substance intended for human consumption that is capable of producing a psychoactive effect.”

The details of these substances and the penalties associated with their possession, supply, and production are set out below:

Psychoactive substances*	Possession	Supply and production
Things that cause hallucinations, drowsiness or changes in alertness, perception of time and space, mood or empathy with others	None, unless you’re in prison	Up to 7 years in prison, an unlimited fine or both

*excludes legitimate substances, such as food, alcohol, tobacco, nicotine, caffeine and medical products from the scope of the offence, as well as controlled drugs, which continue to be regulated by the Misuse of Drugs Act 1971.

It should be noted that “supply” includes all forms of passing drugs to someone else, irrespective of whether payment is made. For example, passing a cannabis joint around a group involves a series of “supplies”. For further information on the penalties relating to both Acts, see: “[Drugs Penalties](#)” and “[List of most commonly encountered drugs currently controlled under the misuse of drugs legislation](#)”. For an up-to-date and fuller list of drugs, substances and their classifications, see “[Drugs A-Z](#)”.

Those aware of being at risk of drug or other substance abuse are encouraged to seek advice from any of the following sources:

- the [College Welfare Team](#), who can provide confidential advice and sign-post additional sources of support
- the [University Counselling Service](#), which can provide confidential advice outside the College context
- OUSU’s [Student Advice Service](#), which can assist students in finding appropriate support
- The [College Doctors](#), who can provide medical advice, and are bound by the conventions of medical confidentiality
- “[Talk to FRANK](#)” (available also by calling 0300 123 6600), a source of up-to-date advice and discussion.

Any student concerned about another student’s dependence on drugs may encourage them to seek advice from one of the sources listed above.

Any member of the College concerned about illegal drug or substance use is encouraged to refer the matter, in confidence, to the Senior Tutor (senior.tutor@linacre.ox.ac.uk).
